

NC (AF2): I can read and record information from non-fiction texts.

Everyone: The digestive system is very complicated. (Agree / Build / Challenge)

Bronze: Find the true or false statements in the text and highlight them.

Silver: Identify whether the statements are true or false according to the text.

Gold: Write 2 more true or false statements.

	True	False
There are five main stages to the digestive system in this text.		
We chew food to make it smaller.		
Swallowing is a simple process.		
Our teeth help us push food into the back of our throats.		
Another name for the windpipe is oesophagus.		
Bile is stored in the gall bladder.		
Any food the body doesn't need sits in the large intestine until it dissolves.
