

Road Safety!

All the children in school were visited by two members of the Nottinghamshire Road Safety Education Team this week. Each class had a special session with the team focusing on different aspects of staying safe on the road. This included safe crossing using STOP, LOOK, LISTEN for the younger pupils. Our older pupils talked about the importance of wearing seatbelts in cars and finding safe places to cross. Finally, the Year 6 children covered independent travel and how to be safe when not accompanied by an adult. All the children listened carefully and took part superbly.

A huge thanks to Notts Road Safety Team for such a great day!

Musical Showcase!

Just before half-term, the pupils of KPNS put on a musical extravaganza for over 130 parents. The choir sang their hearts out, several of our classes showcased what they had been doing in their drumming lessons and we had the most wonderful performances from individuals on the piano, guitar, clarinet and flute. It really was an amazing evening! Thank you to all our children who were brave enough to perform- you made us SO proud! Also, a HUGE thanks to all the staff, parents and music tutors who supported the children with their preparation for the evening.

Our trip to Perlethorpe!

On a bright, early Thursday morning Year 3 were eager to get onto the bus and reach their destination... Perlethorpe in Newark. It was an early start, but this didn't bother the Year 3's as they were rearing to get into a river!

As soon as we arrived, the children noted how peaceful it was! The river was nestled in a working life farm and truly tranquil. We met with our leader for the day who told us about the action plan and reinforced important river safety tips which we listened carefully to.

Our first stop the river of course! We each took turns to wade in the river to search for river wildlife using nets and magnifying glasses. We used our river habit identifier sheet to help us as we each took turns going down to see what we can find. We managed to find the elusive water Scorpion (which is rare!) and fresh water scrimp amongst other creepy crawlies. We then gently returned our new river wildlife back into the river where they belonged. Some of us might have even got a little wet but it didn't matter as we had lots of fun (and spare clothes!). It was a brilliant day and the children enjoyed being surrounded by nature.
